RallyOnline Group

What's an EMR ?

An EMR is an Exercise Modification Request – for handlers with some form of disability who may need some accommodation to be able to perform certain Rally exercises. It can be used for handlers only. Exercises cannot be modified for disabled dogs.

More details and sample forms are available Competing in rally | Events & Activities | Kennel Club (scroll down)...

There is also a blank form on the ROL website. Exercise Modification Request Forms may be sent to admin@rallyonline.org – for either ongoing use in ROL events or a one off event at handlers choice.

If required, please do send your EMR to ROL as soon as possible. If you need help in completing a form, please do contact us via email.
