What are distraction exercises?

There are 3 exercises which are together known as “distraction exercises” (numbers 35,45, & Bonus 8). The distractions should be an empty dog bowl & a silent toy – two of each for the bonus. These distractions should be covered with something that is see through and well ventilated – this is so the scent can flow, and it can be seen on video.

Commonly used covers include things like sieves with the handle cut off, wire fruit bowls upturned.
