RallyOnline Group

What is verification ?

Once we receive a video entry & payment, one of the ROL admin team will watch your round – to check the following things...

- The video is viewable (suitable youtube privacy settings)
- Video is in landscape orientation, (portrait or "youtube shorts" format are not acceptable)
- Video resolution & quality good enough to allow the judge to mark it (e.g. not blurred, not into dark shadows, not zooming in/out, camera not too far away from rally exercises)
- Camera position within 1m of location on course plan.
- Video starts and ends with dog on lead and connected to handler (ie lead held in the hand).
- ROL Ring number is visible in the video.
- Handler shows to camera that their hands are empty shortly before they start the round = "hand flash" / "jazz hands"
- The course is the correct one for the class.
- Both dog and handler remain in view the whole time.
- No training aids visible (unless detailed in special class) e.g. bum bags or take off /landing mats (any matting used must cover more than 70% of the area)

Entries are normally either accepted or rejected and email sent within 48 hours of submission.

If the video passes – then the ring number & dogs name will be added to the class lists which will be published on the ROL website daily during the competition. *It is up to handlers to check their entry appears* – and please do make sure that you are looking at the most recently posted list.

If there is a problem – the video fails verification and the Chief Rally Steward will send an email to the address on the entry form seeking to resolve the issue.
